Samsung at work

Okay, so you want to figure out how tech can transform your space? Well, it isn't only about where you work; it's about how you work. Let's get you started. Samsung displays transform any office location into a fully equipped collaborative space, all without the frustrations that can accompany the modern workplace. It's time to make your office work for you!

INTERACTIVE DISPLAY

Meet where you want

Samsung Flip

Transform any space into a meeting room with the Samsung Flip – an interactive digital flip chart that connects to a wheel-based stand for advanced portability. A versatile alternative to analog boards and paper notes, the Samsung Flip centralizes all meeting needs into a single, fully integrated idea-generation forum, letting your team collaborate and stay engaged. Intuitive and user friendly, the Samsung Flip enables your team members to easily log, save, share and protect game-changing ideas.

Draw, write, inspire

Enjoy the familiar feel of traditional writing in a versatile, digital format.

Capture in collaboration

Make and share notes with your team for easy collaboration.

Intuitive navigation

Easily control the display, access content or make changes on the screen.

Scroll with ease

Quickly search through up to 20 digital Flip pages.

Protect your valuable ideas

A unique password locks the display and hides critical content.

SMART SIGNAGE

Exceptional image quality

Experience true visual expression with deep blacks and superior contrast.

Increased readability

Anti-glare surface treatment delivers great readability in virtually any light.

Excellent durability and reliability

Designed for long-term extended use, with a 24/7 three-year guarantee.

Outstanding brightness and colour uniformity

There is no variation to colour, brightness or luminance, even in elevated temperatures.

Overhaul your wall

Video Walls

Deliver powerful, brilliant visual messages in any environment. From control rooms to digital signage to architectural sites, Samsung Video Walls showcase professional-grade image quality and innovative design for an immersive, realistic experience. Offering excellence in quality, durability and reliability, Samsung Video Walls are designed to meet your business needs and captivate your audience.

Meet Better

Samsung-Harman Meeting Room Bundles

Collaboration no longer requires a group of people huddled around a single cell phone or laptop. Facilitate more productive collaboration with the integrated audio, video and meeting management technologies of Samsung meeting room bundles. Plus, with our leading visual display and HARMAN's pioneering audio and video technology, your team can enjoy a complete high-performing solution for a seamless and efficient meeting. Reduce setup time, ensure discussions start and end on schedule, and leverage features including video conferencing support and document sharing – and dial into the meeting room of the future.

HARMAN BUNDLES

Professional-grade display
 Samsung UHD-quality QMN Series displays (49-, 55- and 65-inch variations) brings laptop-based meeting content to life at high picture quality and clarity, facilitating easier collaboration and engagement across team members.

Superb sound
 HARMAN's AMX Acendo Vibe conferencing sound bar delivers crystal clear audio – so even your most remote participants sound like they're in the room with you.

Bluetooth and USB connectivity
 Facilitators and participants can enjoy seamless audio, video and content streaming using their own devices, ensuring everyone remains engaged and can be seen and heard.

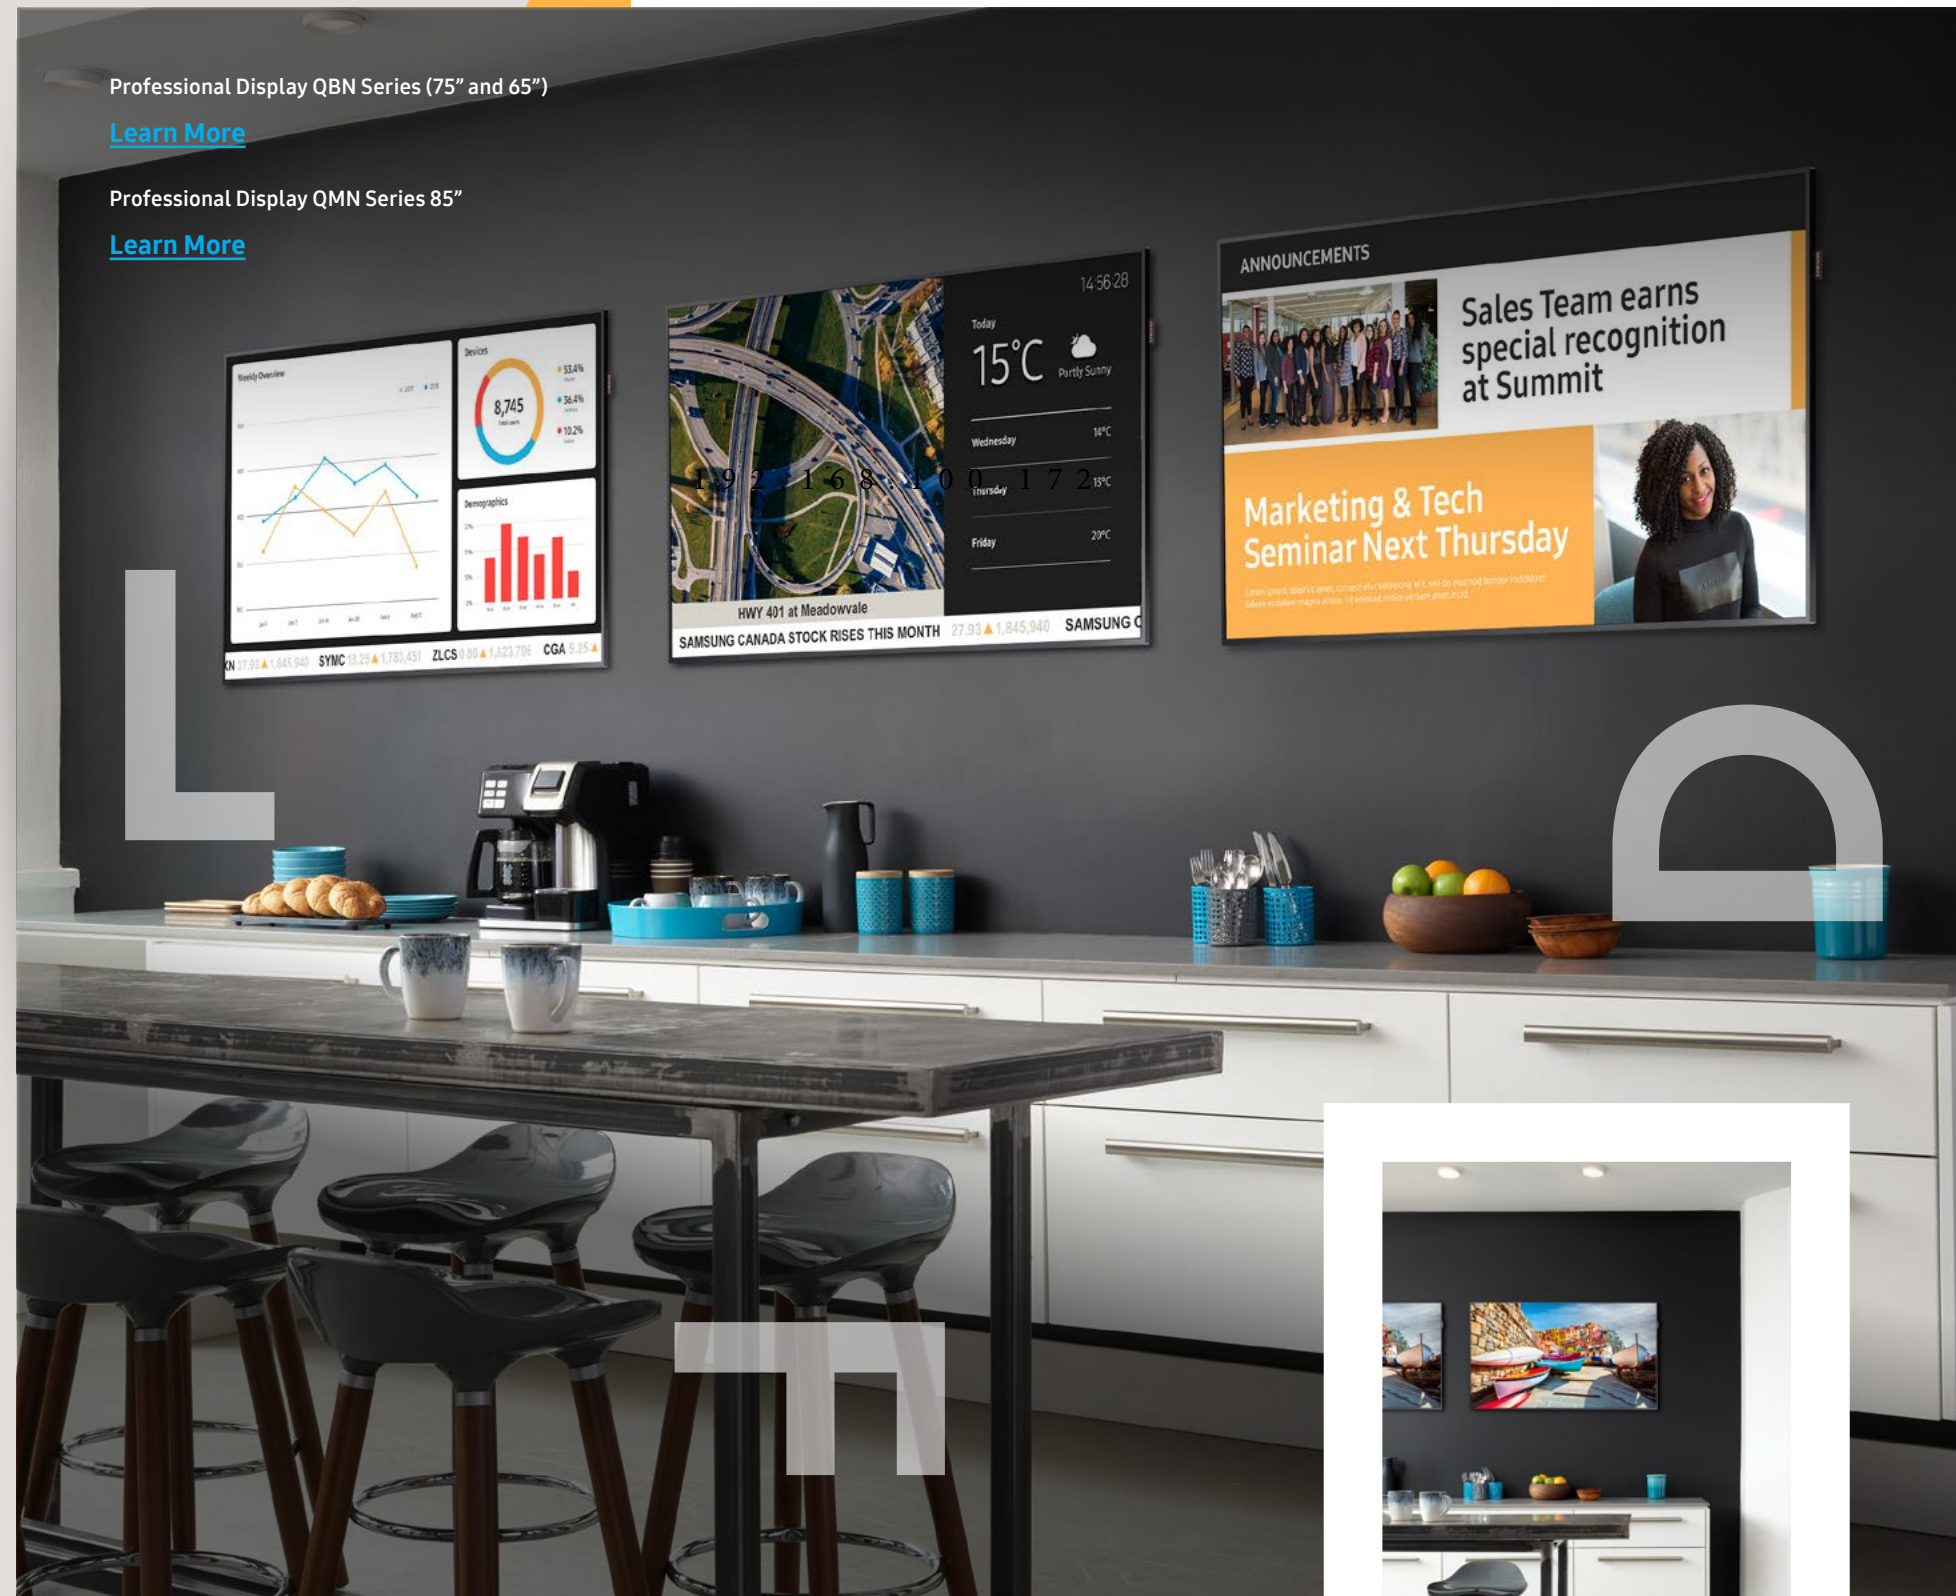

Walls that work

LFD

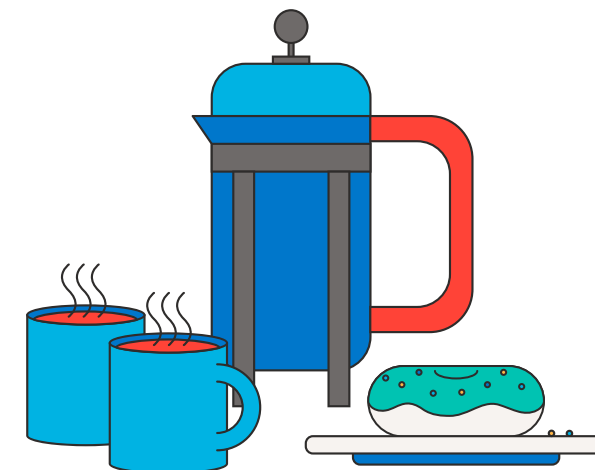

Tell your story through high-impact visual messages using Samsung indoor large-format displays. Professional-grade image quality delivers true visual expression thanks to great contrast ratio, brightness and colour uniformity – and severe testing protocol that ensures that your content will look stunning 24/7. With our largest, slimmest and lightest panels available, and a variety of size and feature options to choose from, Samsung displays can accommodate any indoor signage design and match the needs of your business.

SMART SIGNAGE

- High Impact visual messages**
True visual expression is achieved through superb contrast and brightness.
- Vivid, sharp images**
Experience rich images, excellent picture quality and clear, smooth viewing.
- Flexible design**
Customize your signage with a range of size and feature options.
- Durability and reliability**
Black mura prevention technology allows for 24/7 operation without blackening.
- Outstanding brightness and colour uniformity**
Enjoy brilliant image display in a range of lighting conditions.

Make an impression

LED Displays

Engage indoor customers with realistically brilliant picture quality. Our LED displays combine flexibility with outstanding colour to deliver an attention-grabbing, realistic visual experience. Available in 1.2, 1.5 and 2.0mm pixel pitch, they deliver incredible resolution and detail even from close up. With an 18.8" x 21.2" x 2.5" form factor, they lend themselves to creative and efficient use of your space, while front access maintenance enables catwalk-free installation. Exclusive Samsung technologies and advanced calibration options deliver colour that's noticeably exceptional in any light setting.

Cutting-edge direct view LED technology

Specialized technology maximizes brightness and refines overall picture presentation.

Easy-to-maintain signage

The intuitive design improves operational efficiency while reducing costs.

Captivating indoor LED content

Drive audience engagement in any indoor environment.

Optimize content brilliance

Dynamic peaking technology reduces light interference, delivering peak brightness levels.

Fine-tune uniformity

Sub-pixels are fine-tuned for uniform brightness and colour chromaticity.

Expand composition possibilities

Choose convex or concave* curved configurations, or mount on an incline or a ceiling.**

Easy maintenance with full access

Full access to front and rear display components makes for convenient maintenance.

Streamline UHD Content Display

Compatible S-Box transmits UHD content across multiple displays.

Manage content and devices with remote access

Create, schedule and deploy content across your signage network.
