Insight Azure Governance Jumpstart

A lack of governance can easily cause your cloud usage and spend to spiral out of control, and you might be overprovisioning for ad hoc spikes in demand and paying for under-used resources.

Our Azure Governance jumpstart is a structured and methodical packaged service which incorporate common governance pillars that allows you to take control, giving you comprehensive clarity over your cloud usage and billing, so you get best value from your cloud expenditure.

Insight Azure Governance Jumpstart Approach

Cloud Native Tools

Cost Management	Security Baseline	Identity Baseline	Resource Consistency	Deployment Acceleration
Azure Blueprints	Azure Blueprints	Azure Blueprints	Azure Blueprints	Azure Blueprints
Azure Policy (Compute, General, Network, Tags)	Azure Policy (Compute, General, Network, Tags)		Azure Policy (Compute, General, Network, Tags)	Azure Policy (Compute, General, Network, Tags)

Our Azure Governance Jumpstart approach:

☑ Gather and Assess
- Governance Jumpstart Foundation Questionnaire
- Run the Governance Jumpstart Foundation Assessment Script in Azure
- Gather data from the Questionnaire and Assessment
- Assess the results of the Questionnaire and Assessment

☑ Educate & Review
- Governance Jumpstart Foundation Workshop
  – Solution and Technology Workshop
  – Subscription Configuration Template
  – Policy Configuration Template
  – Blueprint Configuration Template

☑ Deploy
- Deploy Azure Policy
- Deploy Azure Management Groups
- Deploy Blueprints

☑ Report, Review, and Remediate
- Generate Compliance Reports
- Review Compliance Report and Remediation Options

Gartner estimates that organisations that have done little or no cloud cost optimisation may be overspending by 70% or more. Source: nextplatform.com
