

Get your business AI-ready with our Do More with Workshop

Learn how to do more with Microsoft 365 and get your business AI-ready

“Doing more with Microsoft 365” means maximising the impact of Microsoft 365 solutions while simplifying licensing, management, and vendor landscapes. Pressures from the evolving global economy are requiring organisations like yours to reduce costs, improve security, and optimise productivity and collaboration as they prepare their businesses for the era of AI. By delivering the Do More with Microsoft 365 workshop, we help customers identify cost savings and explore a proactive AI strategy to get their entire organisations ready for Microsoft 365 Copilot.

The Do More with Microsoft 365 Briefing focuses on four areas of impact:

Setting up a strong Zero Trust foundation.

A Zero Trust strategy may look complex if you think about its entire architecture. But with a single integrated solution, you can secure and manage identities, defend against threats on multiple platforms while protecting information across your data estate, and finally, create a simplified IT environment with Microsoft 365 to free time for IT and security admins to elevate their focus for higher-value activities.

Driving productivity and collaboration.

We believe in energised and empowered employees. Let us demonstrate how to get everyone connected and working together from anywhere, at any time with Microsoft Teams. And how you can bring your data to life and create a sophisticated map with Semantic Index.

Streamlining endpoint management.

We will show you examples of how Microsoft 365 can improve support and reduce incidents, while empowering IT to deploy any endpoint from the cloud and delivering the best experience for users and support professionals with Windows 11.

Elevating productivity with Microsoft 365 Copilot.

Join us to discover a new way of working with Microsoft 365 Copilot to unleash creativity, unlock productivity, and elevate the skills of your teams.

What you can expect from the workshop:

Zero Trust Foundations:

- Secure & manage identities
- Defend against threats across all your endpoints
- Protect sensitive information across your data estate

Simplified endpoint management

- Deliver the best experience for your employees with Windows 11
- Deploy to virtually any endpoint from the cloud
- Improve support and reduce threats

Productivity and collaboration

- Get everyone connected and working together
- Enable new patterns of work
- Engage and empower your employees

Elevate productivity with Microsoft 365 Copilot

In this 90 minute interactive workshop, you will learn how to use our Value Calculator, which can help you identify specific savings opportunities for your business. We will go through high value scenarios, demos, guided simulations specific for IT Decision Makers and Security Audiences.
