

Integration Assessment

Streamline business processes by integrating and connecting systems

Business challenge

A fully integrated technology infrastructure is critical to the success in leveraging organisational agility and flexibility to meet the increasingly rapid demands of an organisation to innovate and stay competitive. However, as businesses evolve, processes and technology often become siloed across multiple platforms and environments, leading to inconsistent data and the inability to provide a fully integrated business view.

Traditional integration solutions focus on governance and have a limited ability to serve agile business requirements that require accelerated time to market. Running an Integration Assessment sets a pathway for organisations to champion business agility through an integrated infrastructure and single source of business truth.

How we help

Insight's integration specialists will guide you through a two week engagement to provide a detailed analysis of your current application integration portfolio and subsequently develop a roadmap for achieving your integration optimisation strategy. During this engagement we will help understand and assess your business challenges, yielding the following deliverables:

- A detailed application Integrations portfolio assessment
- A modernisation roadmap with integrations prioritised by return on investment
- Business Led Process optimisation workshops
- Guidance on best practices throughout the entire process
- CI/CD pipelines to deploy your apps

Benefits:

- **Identify key assets** that are important for business success.
- **Create a strategy** to address redundant manual processes.
- **Prioritise initiatives** that will enable benefits from your integration portfolio.
- **Understand the benefits** of Azure Integration Services

INSIGHT AWARDS

- 2021 Worldwide Partner of the Year in Solution Assessments and Azure Migration
- Microsoft Solutions Partner for all Solutions Areas
