

# Azure Governance, Security & Cost Control Assessment

Gain insights for best-practice cloud efficiency.

## Business challenge

Public cloud is an enabler for organisational agility and flexibility - however the pace at which a business moves, invariably means that operational governance is often overlooked or difficult to manage, leaving the enterprise open to vulnerabilities. Spiralling costs and cloud usage that is not fit-for-purpose is common place.

Proper governance, security and controls tailored to meet the needs of your organisation should be part of any good cloud strategy. Running an assessment sets a pathway for your organisation to eliminate inefficiencies and vulnerabilities immediately.

## How we help

Insight's team of cloud specialists will guide you through the engagement to provide a detailed analysis of your current business risks and vulnerabilities in your Azure environment, aligned to your corporate policy and operational processes. During this engagement, we'll access your environment utilising Insight scripts, IP and toolsets, focusing on the five disciplines of Cloud Governance:

- **Cost Management:** Understand your licensing entitlements; right sizing of workloads and review alignment to Cost Centres.
- **Security Baseline:** Review your Azure networking segmentation and Security.
- **Identity Baseline:** Review permissions aligned to least privileged model and understand your Identity and Access Management requirements.
- **Resource Consistency:** Review Subscription structure and Naming standards.
- **Deployment Acceleration:** Review existing Service Provisioning around Resource Groups, IaaS and PaaS Workloads

### Duration

2-3 weeks

### Benefits

- **Identify business risks** that are important for business success.
- **Create a strategy** to address challenges and gaps in governance, security and cost control.
- **Prioritise initiatives** for remediation aligned to industry best-practices.
- **Build a robust foundation** for greater cloud adoption
- **Gain control** for cloud ROI.

## Preparing for transformation

To ensure you receive the greatest value from this engagement, our experts will need the following:

- Discovery workshop with your Business and Technical stakeholders to align on a definition of business and technical goals and assess current environment.
- An Azure subscription approved to receive data from your cloud environment.

## What to expect

Ideation & envisioning	Rapid Assessment	Outputs
We'll begin by exploring your organisation's cloud strategy and understand your goals and prioritised pain points in relation to cloud governance, security and cost control. We will meet with your Business Process Owners to conduct a collaborative approach to the discovery.	We will review your current state environment, including configuration and settings by utilising Insight Scripts, IP and toolsets. Through this process, we will identify shortfalls and opportunities for remediation, covering Cost Management, Security, Identity, Resource Consistency and Deployment Acceleration reviews.	An Executive Summary outlining your cloud governance assessment and recommendations. We will provide a report on the current state assessment performed, outlining all details, including identified business risks and areas for focus. A report on remediation activities will provide a set of actionable next steps and guidance on how to execute.

## About Insight

At Insight, we define, architect, implement and manage Insight Intelligent Technology Solutions™ that help your organisation run smarter. We'll work with you to maximise your technology investments, empower your workforce to work smarter, optimise your business and create meaningful experiences.
