

Transform the way your business makes sense of its data

Whether your data is cloud-based or on-premises, straightforward or complex, single-sourced or massively scaled, warehoused or real-time, Power BI is the enabling platform to help you analyse your data and bring your business intelligence efforts to life. For organisations who have decided to leverage the Microsoft Power BI platform to drive analytics outcomes, it is essential that their staff have the knowledge and understanding to effectively use the product within their respective roles.

How we help

Insight's 2-day, hands-on Content Creator Training is perfect for any organisation looking to maximise their Microsoft Power BI investment. Led by our experienced Business Intelligence consultants, this training will provide users with the skills to build end-to-end interactive reporting solutions in PowerBI. Attendees will be exposed to all the capabilities of Power BI Desktop ranging from connecting to data sources, transforming & cleansing data, creating visualisations and finally publishing of content to Power BI.

What to Expect

- Intro to data exploration and discovery
- Overview of Power Query within Power BI desktop
- Basic and advanced Power Query topics
- Data modelling in Power BI desktop
- Introduction to DAX functions
- Date Dimension tables
- Data visualisation
- Content publishing and management within the service

Why Insight

At Insight, we define, architect and implement Digital Solutions that help organisations achieve organisational agility, productivity and competitive performance. We offer a broad mix of technology advisory, design and implementation services and have helped a number of Australian organisations pursue analytics initiatives to achieve actionable insights and mature their in-house capability with Power BI, Modern Data Platforms and Artificial Intelligence.
